Extend your reach
A true 3D mouse, SpaceNavigator represents a great leap forward in controller technology. Unlike conventional mice limited to movement on two flat planes, SpaceNavigator supports effortless motion in all dimensions. You’re now free to roam the exciting new spaces of modern 3D digital environments—without the limits imposed by outmoded “flatworld” technology.

Advanced pressure sensing technology makes the 3D mouse a virtual extension of your body. Move the controller cap to simultaneously pan, zoom, and rotate on the fly, without stopping to select commands. Lightly increase pressure to go faster or decrease pressure to perform precise micro-adjustments.

Using the SpaceNavigator 3D mouse is completely natural—and highly addictive.

Great value
• A precision 3D mouse—at the price of many 2D mice.

Universal compatibility
• Works with your favorite 3D application, on any OS—Windows, Mac, or Linux.

Space-saving
• Small footprint keeps your workspace uncluttered.

Great value
Once the exclusive domain of high-end design professionals, the breakthrough technology in SpaceNavigator is now available to designers, students, and anyone else who wants to enjoy a complete 3D experience. At only $59, the SpaceNavigator Personal Edition is actually priced lower than many 2D mice.

Universal compatibility
SpaceNavigator works with your favorite 3D application, on any OS—Windows, Mac, or Linux.

Use it to power 3D presentations with Adobe Reader or DWF Viewer, or build sophisticated models in Autodesk Inventor or SolidWorks. Explore rich 3D worlds like Google Earth, NASA World Wind, or Microsoft Virtual Earth.

Space-saving
SpaceNavigator’s small footprint keeps your workspace free of clutter. And it’s a stylish addition to your desktop as well.
